

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY MAY 17, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 100 new fires reported yesterday. Three new large fires were reported two in the Eastern Area and one in the Southern Area. Two large fires were contained one each in the Eastern and Southern Areas. Very high to extreme fire indices were reported in Arizona, Minnesota, New Mexico, Oklahoma, and Texas.

SOUTHWEST AREA LARGE FIRES:

RED ROCK, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is burning in grass and brush ten miles south of Sonoita, AZ. Light to moderate spread with occasional short upslope runs were observed. Significant progress was made in containment with air attack and direct attack by hand crews. Structure protection is in place in the Vaughn canyon area.

BOILER, Gila National Forest. This lightning caused Wildland Fire Use fire is ten miles northwest of Poverty Creek, NM and is being managed to accomplish resource objectives. No new information was reported. This will be the last report unless new information is received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
RED ROCK	AZ	CNF	1,300	35	UNK	353	11	16	2	0	130K
BOILER	NM	GNF	20,300	0	UNK	38	1	5	0	0	186K

EASTERN AREA LARGE FIRES:

FEN WILDFIRE, Minnesota Department of Natural Resources. A Type 2 Incident Management Team (Stegmeir) is assigned. The fire is located one mile south of Zim on highway seven. It is burning in grasses, peat, and tamarack. Extreme fire behavior was observed.

NCS = North Carolina Division of Forestry

OUTLOOK:

Weather Discussion. Low pressure will progress across northern Washington today, eventually moving into northern Idaho and western Montana. These locations will receive scattered shower activity today. The low will also drag a cold front across the Northwest, increasing wind across most of the western states. Ahead of the front, temperatures will be warmer and minimum humidity will be slightly drier across the Great Basin and Southwest. From eastern Wyoming into the Dakotas, some thunderstorms are possible. In the Southeast, thunderstorms may become severe today from east Texas northeastward into western Tennessee. South-central Alaska will remain dry in westerly flow.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Some high clouds with a slight chance of afternoon thunderstorms over the Sierras and northern deserts	60-80 Mountains 75-85 Valleys 78-98 Deserts	20-30% Mountains 30-40% Valleys 15-25% Deserts	SW-W 10 to 20 mph
SOUTHWEST AREA Mostly sunny and warmer with afternoon breezes.	Upper 60s to mid 80s mountains, mid 80s to near 105 lower elevations.	5-15% AZ and western NM, 15-30% eastern NM and west TX.	+ S to SW 10-20 mph
EASTERN AREA Becoming partly sunny across the northern 1/2 of MN and far NW WI, slight chance of isolated afternoon thunderstorms over far NW MN	66 to 76	27 to 37%	South to southeast winds increasing to 10 to 20 mph, especially over NW 1/2 of MN

RETARDANT DROP SAFETY

Having retardant dropped on a fire should be a routine event. However, there are risks associated with retardant drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location of lead planes and airtankers during retardant drop operations.
- Be sure you have positive contact with the lead plane or airtanker before the drop.
- Personnel can be injured by the impact of retardant drops. Clear personnel out of the target area when the drop is conducted. If an individual is unable to retreat to a safe place, the best method for minimizing injury from the drop is to:
 - Hold you handtool away from your body.
 - Lie face down with hardhat in place and head toward the oncoming aircraft.
 - Grasp something firm to prevent being carried or rolled about by the retardant.
 - Do not run unless escape is ensured.
 - Get clear of dead snags and tops.
 - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation.
